Introducing our SaaS solution for Companies and Head Hunters.

TERMINUS RECRUITER™

A Web based solution that automates the search and selection process of Human Talent.
We deliver a powerful platform designed from scratch to transform the recruitment experience.

PLAN

- TerminusRecruiter™ intuitively and efficiently assists you in all phases of the search and selection process.

- Raise your productivity and extend your reach with resumes being entered into the database by the applicant itself.

- Automatically publish job opportunities on your web site or other systems through an easy to use API.

- TerminusRecruiter™ accepts applications with QR codes from mobile devices.

EXECUTE

- Manage your CV's database with powerful search and selection filters in a robust and secure way.

- Stay in control with automatic alerts for applications, publications and hiring deadlines.

- Historical record of interviews, assessments and verification of work references.

- Advanced and flexible engine for generation and online delivery of custom tests, surveys and assessments.

- Keep in touch with your database candidates via massive e-mail campaigns.

EVOLVE

- Get rid of the complexities and costs of paper handling and become a company environmentally committed.

- Make the most of your CV's database with up-to-date information.

- Web application provided with transparent access for your applicants and clients: use the system from your own web domain without requiring technological infrastructure.

- Analyze your performance and make better decisions with analitics and reports updated in real time.

- API and Web Services interface to integrate with legacy and support applications.

WINGS FOR YOUR BUSINESS

Focus on your business expansion while we provide and manage cutting-edge technology to support your growth.

Terminus Recruiter™ is a SaaS class Web solution (Software as a Service) that operates from a scalable data infrastructure and elastic computing systems with high availability. Solution hosted on Cloud technology with automated information backups and data redundancy completely managed by Cloud Terminus.
